TOOLS & IDES

Android Studio Visual Studio

XAMPP

EDUCATION

BCA — Bachelor of Computer Applications

Atmiya University, Rajkot — Gujarat
2023 — 2026

CGPA: 8.23

STRENGTHS

Quick Learner Problem Solver
Team Leader Passionate Coder

ABOUT ME

Recent BCA Graduate (CGPA 8.23) from Atmiya University, skilled in Android (Java) and Full-Stack Web Development (PHP, MySQL, Python). Proven Team Leader — secured 2nd Runner-Up at ADSC Hackathon 2.0 by building a real-time GPS Family Tracker. Experienced in e-commerce platforms and WebView-based games. Passionate about problem-solving and seeking an entry-level role in Web or Android App Development.

INTERNSHIP

Android Development Training

Role: Android Developer Intern

- Developed Android applications using Java and Android Studio.
- Worked with RecyclerView, navigation components, and Material UI design patterns.
- Implemented SQLite CRUD operations and Firebase integration.
- Built mini-projects: login system, splash screen, and real-time chat application.

PROJECTS

1. All in One Bazaar — Integrated E-commerce Ecosystem (Web & App)

PHP · MySQL · Java · Android Studio · Firebase

- Dual-platform solution: full-stack responsive website (PHP/MySQL) + native Android app with Firebase real-time sync and push notifications.
- Secure authentication and persistent shopping cart for both platforms; responsive web UI with optimized mobile interface for seamless cross-platform performance.

2. Online Food Ordering System

PHP · MySQL

- Developed dynamic food ordering site with login/signup, session-based cart, and admin dashboard.
- Designed responsive layout for superior user experience across all devices.

3. Sky Jumper — 2D Web Game (WebView)

HTML · CSS · JavaScript · Android WebView

- 2D jumping game embedded in Android app via WebView with gravity physics and collision detection.
- Smooth 60 FPS gameplay with local high-score storage via WebView bridge.

4. Smart Document Merge System

Python (Flask) · HTML · CSS · JavaScript · SQLite

- Web-based document management system with file upload, conversion, and multi-document merging.
- Secure backend file processing with fully responsive user interface.

HACKATHON ACHIEVEMENT

ADSC Hackathon 2.0 — Atmiya University

2nd Runner-Up

Team Phantom | Project: Family Tracker — Live GPS Tracking App

- Led Team Phantom as Team Leader, guiding the team to 2nd Rank among all participants.
- Built a real-time GPS Android app for live family location tracking and safety monitoring.
- Implemented live location sharing using Firebase, Google Maps API, and FCM push notifications.
- Integrated Brevo API for automated email invitations; added live battery monitoring and in-app Call API.
- Technologies: Java · Firebase · Google Maps API · Brevo API · FCM
